DETAILED ACTION

Response to Amendment

1. Applicant's explanation of the instant invention in pointing the difference with the cited prior art was found to be persuasive.

Allowable Subject Matter

2. Claims 1 and 2 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claims 1 and 2 recite, inter alia, a method of manufacturing a semiconductor device comprising the steps of depositing an insulation film, a first metal film, an antireflection film including a dielectric layer, patterning the metal and the antireflection film to form the lower electrode, forming a second insulation layer into which two openings are formed. The first opening is used for depositing the upper electrode and the second opening is used to form a contact by removing the anti reflection film from the second opening. Although, Hsue, US 6,483,142 teaches a method for forming a metal-insulator-metal capacitor similar to the invention, he fails to teach forming the anti reflection layer of the invention. Similarly, Marsuhashi, US 6,759,703 fails to teach the step of forming the two openings in the upper insulation layer to form the upper electrode and the contact by removing the anti reflection film from the second opening. Furthermore, the art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Conclusion

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
